

KETOKED

Your kid's shield

Almost all infants and children younger than 2 years suffers from the repeated occurrence of skin problems.

- Diaper rash, Eczema and infectious disorders are the most occurring.
- Diaper rash is an inflamed skin (dermatitis) appears on the skin under a diaper.
- It typically occurs in infants and children younger than 2 years, but the rash can also be seen in people who are incontinent or paralyzed.

It has many causes:

- Friction
- Irritation
- Bacterial or yeast (fungal) Infection
- Allergic reaction

Also, Eczema causes the skin to become inflamed or irritated.

- It affects about 10% to 20% of infants and children.
- It is this response that causes the symptoms of eczema :
itching – irritation – inflammation.
- These problems need very potent ingredients with different mechanisms to control it.
